

Knowledge Base:

The top 10 terms that we looked at to see what would go in the knowledge base were the words: Messi, Lionel, Argentina, PSG, Ronaldo, Rosario, Mbappe, Goals, Assists, Forward. The reason we chose these words was that it was a mix of personal, professional, and statistical facts about Lionel Messi. The reason this is good for us is because when creating our knowledge base for a chatbot, we wanted our chatbot to do more than just give out playing stats about Messi. Instead, we wanted our chatbot to be more sophisticated and have a more personal relation with the user. This way if a user says something such as how they are a Ronaldo fan, Messi's biggest rival, the chat bot will be able to register this and give out a witty and fun response to this. This helps make the chatbot more personable to the user and better for use. Along with this it allows for a broader range of conversation that can possibly in the future include topics about other soccer athletes. We decided to create our knowledge base by taking our top 10 terms and finding out what sentences had these terms in them. From there we stored all these sentences into a list and later pickled it to save the data. With sentences it makes it much easier for the chatbot to come up with fuller and more complex responses rather than one or two word responses. Below is our knowledge base
